

# PRODUCT INFORMATION

## iCM

### *Hand Microphone for Icom Only!*

#### Specifications:

- High quality Stick Microphone
- Frequency range 35Hz to 10,000Hz
- Platinum finish body
- 'iC' electret insert
- PTT switch - (Soft Touch) non latching type
- Complete with 1.5m mic cable and 8-pin plug
- c/w threaded mic. stand adaptor.

The iCM is a professional quality stick microphone in a Platinum finish body. Complete with the Heil 'iC' microphone element which is specially designed for Icom transceivers.

For many years the mic. preamplifier was built into the Icom fist mic. Change the Icom mic with another make and unless it had a suitable pre-amp the replacement mic. did not work.

The iCM is the answer to this problem with its 'iC' electret element and provides the missing preamplification for the ICOM range of DSP transceivers. It is particularly suitable for early Icom rigs.

The iCM comes complete with a self attached 1.5m (5ft) length of 'Heilwire' cable and terminates in a 8-pin plug for most Icom rigs. A 1/4in female pig tail exits this 8-pin connector that allows for a connection to a PTT footswitch or hand switch.

The iCM requires +8V DC but this is provided on all Icom rigs. Most of the stands, booms and mounts can be used to mount this microphone in the most suitable spot for ease of operating.
