- Frequency 26 - 54 / 68 - 88 / 137 -174 / 380-512MHz
- Mode FM
- Memories 50
- Search speed 50 steps/sec
- Scan speed 25Ch/sec
- Scan delay 2 secs
- 5kHz and 12.5kHz steps
- Priority channel
- Antenna rubber duck, BNC
- LCD
- Audio 180mW into 8 Ohms int. speaker
- Built-in charging circuit for rechargeable batteries
- Power 6 x AA (not included), ext. power 9V DC

The PSR-255 is designed as a simple to operate scanner that covers all the main communications bands in the VHF and UHF spectrum.

With 50 memories and the scanning facility, you can zip through the radio spectrum and store the most interesting frequencies as you come across them. The squelch control makes sure that there is silence between transmissions and the removable BNC antenna makes it possible to use an external antenna for even greater performance and range.

Power is from 6 x AA cells (not supplied) and if you choose to use rechargeable cells, then these can be charged in situ using a suitable external 12V supply. The charger regulator circuit is built inside the radio.

Good Value for money

Order As PSR-255 Handheld AM/FM Scanner
