Lighter than an IC-706!
And about the Same Size!

The SEC-1223 power supply heralds the era of a new compact breed of units that may be small but make no sacrifice in terms of power capability and overall performance.

Using switch mode techniques, the SEC-1223 achieves the ideal combination of compact dimensions, light weight and reliability under a wide range of conditions. Special attention has been given to RF immunity making this one of the most docile supplies available even when used in the presence of strong RF signals.

The SEC-1223 delivers pure, stable, and reliable power, making it just as much at home in commercial use as it is in hobby use.
